UStudies will work with Honors Curriculum Committee to put in place a template (Shell) during 2013-2014 for all courses under HON 319

HON 315: Art, Culture, and Humanities, 4 credits
Catalog description: This is a generic description
Examines historical approaches to aesthetics – the philosophy and theory of "beauty" and "art." We discuss the origins of aesthetic philosophy in the eighteenth century and explore select philosophers, artists, and historians of the nineteenth through twenty-first centuries whose ideas have been central to the ways in which we look and talk about art and life. Incorporates a multi-disciplinary approach to the theory, meaning, and production of art.

HON 317: Politics, Institutions, and Society, 4 credits
Catalog description: This is a generic description
Explores the normative complexities involved in the interplay between individuals, institutions, and public policy issues in modern democracy. Examines this using some of the weightiest challenges we face today, such as climate change, dilemmas of stem cell research, and hunger and health. Ethical, social, and political implications for citizens in the context of a civil society are addressed.

HON 319: Science, Sustainability, and Nature, 4 credits
Catalog description: This is a generic description
Examines critical issues facing society that relate to science, nature, or sustainability. Issues are explored from scientific, historical, cultural, economic, and social perspectives. Analyzes nature, origins, and ethical concerns of selected problems or conflicts.
