# NSSE 2020 Administration Summary

Southern Oregon University

### **Administration Summary**

This report provides an overview of your NSSE administration, including details about your population and sample, response rates, representativeness of your respondents, survey customization choices, and recruitment message schedule. This information can be useful for assessing data quality and planning future NSSE administrations.

#### Population and Respondents

The table at right reports your institution's population sizes, how many students were sampled (whether census-administered or randomly selected), and how many completed the survey.

Survey completions	First-year	Senior
Submitted population	548	1,249
Adjusted population <sup>a</sup>	451	1,091
Survey sample <sup>b</sup>	451	1,091
Total respondents <sup>b</sup>	140	408
Full completions <sup>c</sup>	99	346
Partial completions	41	62

a. Adjusted for ineligible students and those for whom survey requests were returned as undeliverable.

c. Submitted demographic and (if applicable) Topical Module sets.

#### **Response Rate and Sampling Error**<sup>a</sup>

The table below summarizes response rates and sampling errors for your institution and comparison groups. For more information see NSSE's Response Rate FAQ: go.iu.edu/NSSE-RRFAQ

	First-year				Ser	nior		
		Pub4YrFT	PubBalA &	Pub4YrPrim		Pub4YrFT	PubBalA &	Pub4YrPrim
	SOU	TransInclAdm	SwSomeGrad	UG<10000	SOU	TransInclAdm	SwSomeGrad	UG<10000
Response rate	31%	24%	26%	25%	37%	25%	26%	28%
Sampling error <sup>b</sup>	+/- 6.9%	+/- 0.9%	+/- 0.6%	+/- 1.0%	+/- 3.8%	+/- 0.8%	+/- 0.6%	+/- 0.8%

a. Comparison group response rate and sampling error were computed at the student level (i.e., they are not institution averages) for all respondents.

b. Also called "margin of error," sampling error is an estimate of the amount a score based on a sample could differ from the true score on a given item. For example, if the sampling error is +/- 5.0% and 40% of your students replied "Very often" to a particular item, then the true population value is most likely between 35% and 45%.

#### **Representativeness and Weighting**

The first table at right details variables submitted in your population file. Respondent and population percentages are listed side by side as a convenience to see how well the characteristics of your respondents reflect your first-year and senior populations. For detailed characteristics of the respondents in your reports, refer to your *Respondent Profile*.

NSSE data files include weights by institution-reported sex and enrollment status so institutional estimates reflect the population with respect to these characteristics. The second table at right provides the respondent and population proportions used to calculate your weights. For more information, see go.iu.edu/NSSE-weights

presentativeness	esentativeness First-year		Ser	Senior	
- 	Respondent %	Population %	Respondent %	Population %	
Female	73	57	74	62	
Full-time	97	96	84	84	
First-time, first-year	89	88	N/A	N/A	
Race/ethnicity <sup>a</sup>					
Am. Indian or Alaska Native	2	1	1	1	
Asian	2	3	1	2	
Black or African American	0	3	2	2	
Hispanic or Latino	16	17	10	11	
Native Hawaiian/Other Pac. Isl.	2	2	0	1	
White	60	56	63	61	
Other	0	0	0	0	
Foreign or nonresident	4	2	0	1	
Two or more races/ethnicities	11	12	12	10	
Unknown	2	3	11	11	

a. Based on the IPEDS categories submitted in the population file. Results for institutions without full (at least 90%) race/ethnicity information in the population file are not reported.

eighting <sup>a</sup>	First-	year	Senior	
	Respondent %	Population %	Respondent %	Population %
Full-time, female	71	55	63	51
Full-time, male	26	41	22	32
Part-time, female	1	2	11	10
Part-time, male	1	2	5	6

a. Weights were also calculated for students with "Another" or "Unknown" codes for sex.

b. Number of census or randomly sampled students invited to complete the survey. Targeted, experimental, and locally administered samples not included.

# **NSSE 2020 Administration Summary**

#### **Survey Options**

The options at right were available to customize the content of your NSSE survey and to collect complementary data from companion surveys.

Administration	features
----------------	----------

Survey sample type	Census	
Recruitment method	Email	
Portal/LMS used <sup>a</sup>	Yes (7, 1%)	
Incentive offered	Yes	
Survey version	U.S. English	
Institution logo used in survey	Yes	
Mobile respondents <sup>b</sup>	335, 61%	
Additional question sets and companior	n surveys	
Topical module(s)	FY Experiences / Sr Transitions	
Customized consortium questions	Sustainability Education Consortium	
BCSSE 2019	No	
FSSE 2020	No	

a. Institutions that used their student portal or learning management system to recruit students are indicated by "Yes" followed by the number and percentage of respondents who used posted survey links.

b. Number and percentage of students who responded with a smartphone or tablet. See the "operating system" variables in your SPSS data file for additional details.

#### **Recruitment Messages**

Students received up to five direct contacts. Your institution had the option to customize message content and timing.

# Message schedule

viessage schedule		Cumulative response rate		
	Date	First-year	Senior	
Invitation	04/13/2020	19%	19%	
Reminder 1	04/21/2020	23%	25%	
Reminder 2	04/27/2020	26%	31%	
Reminder 3	05/05/2020	30%	35%	
Final reminder	05/11/2020	31%	37%	

#### **Report Customization**

option to customize the comparison groups used in reports. The group selected for the Snapshot comparisons is identified with an asterisk.

# **Southern Oregon University**

# **A Summary of Student Engagement Results**

Student engagement represents two critical features of collegiate quality. The first is the amount of time and effort students put into their studies and other educationally purposeful activities. The second is how institutional resources, courses, and other learning opportunities facilitate student participation in activities that matter to student learning. NSSE surveys undergraduate students in their first and final years to assess their levels of engagement and related information about their experience at your institution.

**Comparison Group** 

The comparison group featured in this report is

#### Pub4YrFT TransInclAdm

See your *Selected Comparison Groups* report for details.

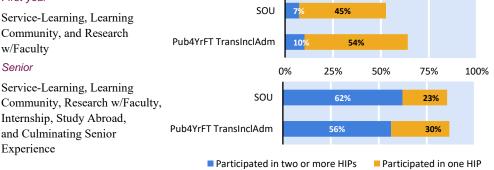

This *Snapshot* is a concise collection of key findings from your institution's NSSE 2020 administration. We hope this information stimulates discussions about the undergraduate experience. Additional details about these and other results appear in the reports referenced throughout.

# **Southern Oregon University**

# Academic Challenge: Additional Results

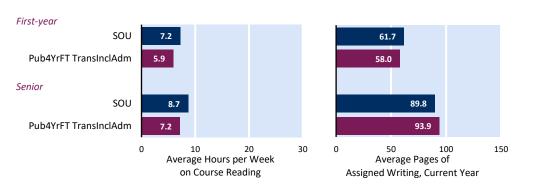

The Academic Challenge theme contains four Engagement Indicators as well as several important individual items. The results presented here provide an overview of these individual items. For more information about the Academic Challenge theme, see your *Engagement Indicators* report. To further explore individual item results, see your *Frequencies and Statistical Comparisons*, the *Major Field Report*, the *Online Institutional Report*, or the Report Builder.

### **Time Spent Preparing for Class**

#### **Reading and Writing**

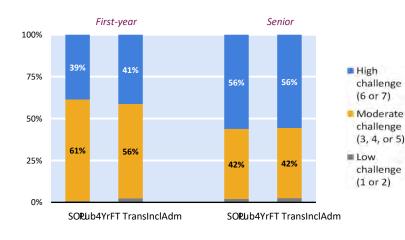

These figures summarize the number of hours your students spent reading for their courses and the average number of pages of assigned writing compared to students in your comparison group. Each is an estimate calculated from two or more separate survey questions.

Average Hours per Week Preparing for Class

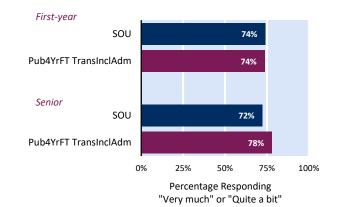

### **Challenging Students to Do Their Best Work**

To what extent did students' courses challenge them to do their best work? Response options ranged from 1 = "Not at all" to 7 = "Very much."

#### **Academic Emphasis**

How much did students say their institution emphasizes spending significant time studying and on academic work? Response options included "Very much," "Quite a bit," "Some," and "Very little."

# **NSSE** national survey of student engagement

# NSSE 2020 Snapshot

# **Southern Oregon University**

## **Item Comparisons**

By examining individual NSSE questions, you can better understand what contributes to your institution's performance on the Engagement Indicators. This section displays the five questions<sup>a</sup> on which your students scored the highest and the five questions on which they scored the lowest, relative to students in your comparison group. Parenthetical notes indicate whether an item belongs to a specific Engagement Indicator or is a High-Impact Practice. While these questions represent the largest differences (in percentage points), they may not be the most important to your institutional mission or current program or policy goals. For additional results, see your *Frequencies and Statistical Comparisons* report.

# **Southern Oregon University**

### **How Students Assess Their Experience**

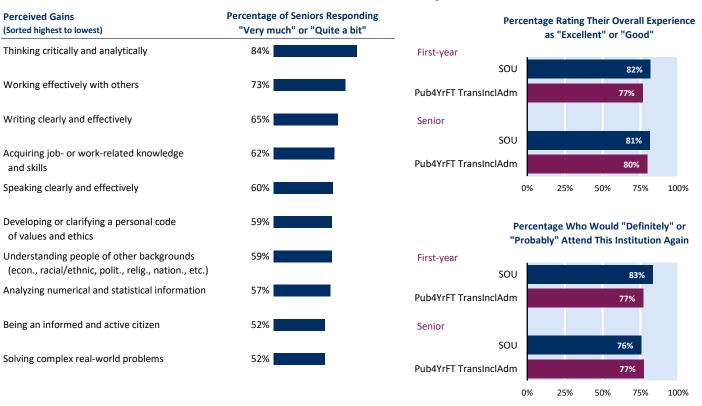

Students' perceptions of their cognitive and affective development, as well as their overall satisfaction with the institution, provide useful evidence of their educational experiences. For more details, see your *Frequencies and Statistical Comparisons* report.

#### **Perceived Gains Among Seniors**

Students reported how much their experience at your institution contributed to their knowledge, skills, and personal development in ten areas.

#### Satisfaction with SOU

Students rated their overall experience at the institution, and whether or not they would choose it again.

## **Administration Details**

#### **Additional Questions**

Your institution administered the following additional question sets: **First-Year Experiences and Senior Transitions Sustainability Education Consortium** See your *Topical Module* and *Consortium* reports for results.

### What is NSSE?

NSSE annually collects information at hundreds of four-year colleges and universities about student participation in activities and programs that promote their learning and personal development. The results provide an estimate of how undergraduates spend their time and what they gain from attending their college or university. Institutions use their data to identify aspects of the undergraduate experience that can be improved through changes in policy and practice.

NSSE has been in operation since 2000 and has been used at more than 1,600 colleges and universities in the US and Canada. More than 90% of participating institutions administer the survey on a periodic basis.

Southern Oregon University

**Report Sections** 

# About Your Engagement Indicators Report

Engagement Indicators (EIs) provide a useful summary of the detailed information contained in your students' NSSE responses. By combining responses to related NSSE questions, each EI offers valuable information about a distinct aspect of student engagement. Ten indicators, based on three to eight survey questions each (a total of 47 survey questions), are organized into four broad themes as shown at right.

Theme	Engagement Indicator
	Higher-Order Learning
Academic Challenge	Reflective & Integrative Learning
<u> </u>	Learning Strategies
	Quantitative Reasoning
Learning with Peers	Collaborative Learning
Leanning with reers	Discussions with Diverse Others
Experiences with Faculty	Student-Faculty Interaction
	Effective Teaching Practices
Campus Environment	Quality of Interactions
campus environment	Supportive Environment

Displays how average EI scores for your students compare with those of students at your comparison Overview (p. 3) group institutions. Detailed views of EI scores within the four themes for your students and those at comparison group Theme Reports (pp. 4-13) institutions. Three views offer varied insights into your EI scores: Mean Comparisons Straightforward comparisons of average scores between your students and those at comparison group institutions, with tests of significance and effect sizes (see below). Score Distributions Box-and-whisker charts show the variation in scores within your institution and comparison groups. Performance on Indicator Items Responses to each item in a given EI are summarized for your institution and comparison groups. Comparisons with High-Comparisons of your students' average scores on each EI with those of students at institutions whose Performing Institutions (p. 15) average scores were in the top 50% and top 10% of 2019 and 2020 participating institutions. Detailed Statistics (pp. 16-19) Detailed information about EI score means, distributions, and tests of statistical significance.

#### **Interpreting Comparisons**

Mean comparisons report both statistical significance and effect size. Effect size indicates the practical importance of an observed difference. For EI comparisons, NSSE research has concluded that an effect size of about .1 may be considered small, .3 medium, and .5 large (Rocconi & Gonyea, 2018). Comparisons with an effect size of at least .3 in magnitude (before rounding) are highlighted in the Overview (p. 3).

*Els vary more among students within an institution than between institutions*, like many experiences and outcomes in higher education. As a result, focusing attention on average scores alone amounts to examining the tip of the iceberg. It's equally important to understand how student engagement varies within your institution. Score distributions indicate how EI scores vary among your students and those in your comparison groups. The Report Builder and your *Major Field Report* (both to be released in the fall) offer valuable perspectives on internal variation and help you investigate your students' engagement in depth.

#### **How Engagement Indicators are Computed**

Each EI is scored on a 60-point scale. To produce an indicator score, the response set for each item is converted to a 60-point scale (e.g., Never = 0; Sometimes = 20; Often = 40; Very often = 60), and the rescaled items are averaged. Thus a score of zero means a student responded at the bottom of the scale for every item in the EI, while a score of 60 indicates responses at the top of the scale on every item.

For more information on EIs and their psychometric properties, refer to the NSSE website: nsse.indiana.edu

Rocconi, L.M., & Gonyea, R.M. (2018). Contextualizing effect sizes in the National Survey of Student Engagement: An empirical analysis. *Research & Practice in Assessment,* 13 (Summer/Fall), pp. 22-38.

Overview

### **Southern Oregon University**

### **Engagement Indicators: Overview**

Engagement Indicators are summary measures based on sets of NSSE questions examining key dimensions of student engagement. The ten indicators are organized within four broad themes: Academic Challenge, Learning with Peers, Experiences with Faculty, and Campus Environment. The tables below compare average scores for your students with those in your comparison groups.

Use the following key:

- **Your students' average** was significantly higher (p < .05) with an effect size at least .3 in magnitude.
- $\triangle$  Your students' average was significantly higher (p < .05) with an effect size less than .3 in magnitude.
- -- No significant difference.
- $\nabla$  Your students' average was significantly lower (p < .05) with an effect size less than .3 in magnitude.
- **Vour students' average** was significantly lower (p < .05) with an effect size at least .3 in magnitude.

### **Southern Oregon University**

# Academic Challenge: First-year students

Challenging intellectual and creative work is central to student learning and collegiate quality. Colleges and universities promote student learning by challenging and supporting them to engage in various forms of deep learning. Four Engagement Indicators are part of this theme: *Higher-Order Learning, Reflective & Integrative Learning, Learning Strategies,* and *Quantitative Reasoning.* Below and on the next page are three views of your results alongside those of your comparison groups.

Mean Comparisons		Your first-year students compared with						
	SOU Pub4YrFT Ti		ransInclAdm			Pub4YrPrin	n UG<10000	
			Effect		Effect		Effect	
Engagement Indicator	Mean	Mean	size	Mean	size	Mean	size

4c. Analyzing an idea, experience, or line of reasoning in depth by examining its parts	69	-7	-6	-6
4d. Evaluating a point of view, decision, or information source	69	-5	-4	-5
4e. Forming a new idea or understanding from various pieces of information	74	-0	+1	+1
Reflective & Integrative Learning				
Percentage of students who responded that they "Very often" or "Often"				
2a. Combined ideas from different courses when completing assignments	72	+2	+2	+5
2b. Connected your learning to societal problems or issues	64	+0	+2	+4
Included diverse perspectives (political, religious, racial/ethnic, gender, etc.) in course discussions or assignments	58	+0	+3	+5
2d. Examined the strengths and weaknesses of your own views on a topic or issue	68	+1	+1	+1
2e. or her perspective	75	-0	+1	+1
2f. Learned something that changed the way you understand an issue or concept	68	-6	-4	-3
2g. Connected ideas from your courses to your prior experiences and knowledge	84	+1	+0	+1
Learning Strategies				
Percentage of students who responded that they "Very often" or "Often"				
9a. Identified key information from reading assignments	81	+4	+3 📕	+2
9b. Reviewed your notes after class	58	-8	-6	-10
9c. Summarized what you learned in class or from course materials	62	-3	-3	-7
Quantitative Reasoning				
Percentage of students who responded that they "Very often" or "Often"				
Reached conclusions based on your own analysis of numerical information (numbers, graphs, statistics, etc.)	48	-6	-6	-7
Used numerical information to examine a real-world problem or issue (unemployment, climate change, public health, etc.)	42	-5	-3	-4
6c. Evaluated what others have concluded from numerical information	45	-1	+1	+0

Notes: Refer to your *Frequencies and Statistical Comparisons* report for full distributions and significance tests. Item numbering corresponds to the survey facsimile available on the NSSE website.

a. Percentage point difference = Institution percentage- Comparison group percentage. Because results are rounded to whole numbers, differences of less than 1 point may or may not display a bar. Small, but nonzero differences may be represented as +0 or -0.

**Learning with Peers** 

### **Southern Oregon University**

### Learning with Peers: First-year students

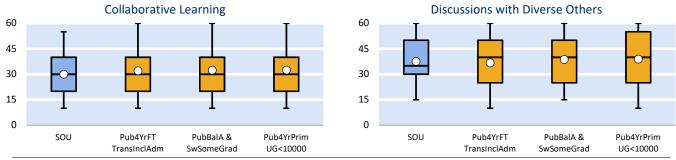

Collaborating with others in mastering difficult material and developing interpersonal and social competence prepare students to deal with complex, unscripted problems they will encounter during and after college. Two Engagement Indicators make up this theme: *Collaborative Learning* and *Discussions with Diverse Others*. Below are three views of your results alongside those of your comparison groups.

## Mean Comparisons

viean Comparisons		Your first-year students compared with						
	SOU	Pub4YrFT TransInclAdm		PubBalA & SwSomeGrad		Pub4YrPrir	n UG<10000

# Comparisons with High-Performing Institutions Southern Oregon University

## Comparisons with Top 50% and Top 10% Institutions

While NSSE's policy is not to rank institutions (see go.iu.edu/NSSE-PnP), the results below are designed to compare the engagement of your

students with those attending two groups of institutions identified by NSSE<sup>a</sup> for their high average levels of student engagement:

- (a) institutions with average scores placing them in the top 50% of all 2019 and 2020 NSSE institutions, and
- (b) institutions with average scores placing them in the top 10% of all 2019 and 2020 NSSE institutions.

While the average scores for most institutions are below the mean for the top 50% or top 10%, your institution may show areas of distinction where your average student was as engaged as (or even more engaged than) the typical student at high-performing institutions. A check mark  $(\checkmark)$  signifies those comparisons where your average score was at least comparable<sup>b</sup> to that of the high-performing group. However, the presence of a check mark does not necessarily mean that your institution was a member of that group.

It should be noted that most of the variability in student engagement is within, not between, institutions. Even "high-performing" institutions have students with engagement levels below the average for all institutions.

Notes: Results weighted by institution-reported sex and enrollment status (and institution size for comparison groups); Effect size: Mean difference divided by the pooled standard deviation; \*p < .05, \*\*p < .01, \*\*\*p < .001 (2-tailed).

a. Precision-weighted means (produced by Hierarchical Linear Modeling) were used to determine the top 50% and top 10% institutions for each Engagement Indicator from all NSSE 2019 and 2020 institutions, separately by class. Using this method, Engagement Indicator scores of institutions with relatively large standard errors were adjusted toward the mean of all students, while those with smaller standard errors received smaller corrections. As a result, schools with less stable data—even those with high average scores—may not be among the top scorers. NSSE does not publish the names of the top 50% and top 10% institutions because of our commitment not to release institutional results and our policy against ranking institutions.

b. Check marks are assigned to comparisons that are either significant and positive, or non-significant with an effect size >-.10.

a. Results weighted by institution-reported sex and enrollment status (and institutional size for comparison groups).

b. Standard deviation is a measure of the amount the individual scores deviate from the mean of all the scores in the distribution.

c. Standard error of the mean, used to compute a confidence interval (CI) around the sample mean. For example, the 95% CI (equal to the sample mean +/- 1.96 x SE)

is the range that is 95% likely to contain the true population mean.

d. A percentile is the point in the distribution of student-level EI scores at or below which a given percentage of EI scores fall.

e. Degrees of freedom used to compute the t-tests. Values vary from the total Ns due to weighting and whether equal variances were assumed.

f. Statistical significance represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.

g. Effect size is the mean difference divided by the pooled standard deviation.

a. Results weighted by institution-reported sex and enrollment status (and institutional size for comparison groups).

b. Standard deviation is a measure of the amount the individual scores deviate from the mean of all the scores in the distribution.

c. Standard error of the mean, used to compute a confidence interval (CI) around the sample mean. For example, the 95% CI (equal to the sample mean +/- 1.96 x SE)

is the range that is 95% likely to contain the true population mean.

d. A percentile is the point in the distribution of student-level EI scores at or below which a given percentage of EI scores fall.

e. Degrees of freedom used to compute the t-tests. Values vary from the total Ns due to weighting and whether equal variances were assumed.

f. Statistical significance represents the probability that the difference between the mean of your institution and that of the comparison group occurred by chance.

g. Effect size is the mean difference divided by the pooled standard deviation.

Southern Oregon University

#### **About This Report**

# About Your High-Impact Practices Report

Due to their positive associations with student learning and retention, certain undergraduate opportunities are designated "high-impact." High-Impact Practices (HIPs) share several traits: They demand considerable time and effort, facilitate learning outside of the classroom, require meaningful interactions with faculty and students, encourage collaboration with diverse others, and provide frequent and substantive feedback. As a result, participation in these practices can be life-changing (Kuh, 2008). NSSE founding director George Kuh recommends that institutions should aspire for all students to participate in at least two HIPs over the course of their undergraduate experience—one during the first year and one in the context of their major (NSSE, 2007).

NSSE asks students about their participation in the six HIPs shown in the box at right. Unlike most questions on the NSSE survey, the HIP questions are not limited to the current school year. Thus, senior students' responses include participation from prior years.

#### High-Impact Practices in NSSE

Service-Learning Courses that included a community-based project

#### Learning Community

Formal program where groups of students take two or more classes together

Research with Faculty Work with a faculty member on a research project

Internship or Field Experience Internship, co-op, field experience, student teaching, or clinical placement

**Study Abroad** 

**Culminating Senior Experience** Capstone course, senior project or thesis, comprehensive exam, portfolio, etc.

#### **Report Sections**

•	
Participation Comparisons (p. 3)	Displays HIP participation for your students compared with that of students at your comparison group institutions. Two views present insights into your students' HIP participation:
	Overall HIP Participation
	Displays the percentage of students who participated in one HIP and in two or more HIPs, relative to those at your comparison group institutions.
	Statistical Comparisons
	Comparisons of participation in each HIP and overall for your students relative to those at comparison group institutions, with tests of significance and effect sizes.
Response Detail (pp. 4-5)	Provides complete response frequencies for the relevant HIP questions for your students and those at your comparison group institutions. First-year results include a summary of their expectations for future HIP participation.
Participation by Student Characteristics (p. 6)	Displays your students' participation in each HIP by selected student characteristics.

#### **Interpreting Comparisons**

*HIP participation varies more among students within an institution than it does between institutions,* like many experiences and outcomes in higher education. As a result, focusing attention on overall participation rates amounts to examining the tip of the iceberg. It is equally important to understand how student engagement (including HIP participation) varies *within* your institution. The table on page 6 provides an initial look at how HIP participation varies by selected student characteristics. The Report Builder and your *Major Field Report* (both to be released in the fall) offer further perspectives on internal variation and can help you investigate your students' HIP participation in depth.

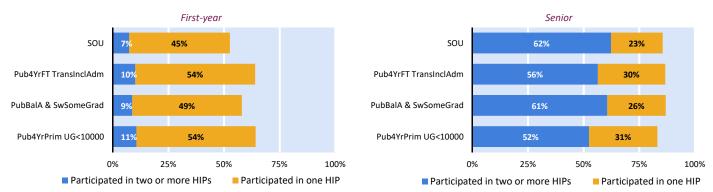

Kuh, G. D. (2008). High-impact educational practices: What they are, who has access to them, and why they matter. Washington, DC: Association of American Colleges and Universities. National Survey of Student Engagement (2007). Experiences that matter: Enhancing student learning and success—Annual Report 2007. Bloomington, IN: Indiana University Center for Postsecondary Research.

Rocconi, L.M., & Gonyea, R.M. (2018). Contextualizing effect sizes in the National Survey of Student Engagement: An empirical analysis Research & Practice in Assessment, 13 (Summer/Fall), pp. 22-38.

# **Overall HIP Participation**

The figures below display the percentage of students who participated in High-Impact Practices. Both figures include participation in service-learning, a learning community, and research with faculty. The senior figure also includes participation in an internship or field experience, study abroad, and culminating senior experience. The first segment in each bar shows the percentage who participated in at least two HIPs, and the full bar (both colors) represents the percentage who participated in at least one.

#### **Statistical Comparisons**

The table below displays the percentage of your students who participated in a given High-Impact Practice, including the percentage who participated in at least one or in two or more HIPs. It also graphs the difference, in percentage points, between your students and those of your comparison groups. Blue bars indicate how much higher your institution's percentage is compared to the comparison group. Dark red bars indicate how much lower your institution's percentage is compared to the comparison group percentages appear on the following pages.)

Participated in two or more	62	+6	* .12	+2	.03	+10	*** .20

Your students' participation compared with:

a. Percentage point differences (institution – comp. group) rounded to whole numbers. Values less than one may not display a bar and may be shown as +0 or -0. b. Cohen's *h* (standardized difference between two proportions). Effect sizes indicate the practical importance of observed differences. For service-learning,

internships, study abroad, and culminating senior experiences, an ES of about .2 may be considered small, .5 medium, and .8 large. For learning community and research with faculty, an ES of about .1 may be considered small, .3 medium, and .5 large (Rocconi & Gonyea, 2018).

\*p < .05, \*\*p < .01, \*\*\*p < .001 (*z*-test comparing participation rates).

Note: Participation includes the percentage of students who responded "Done or in progress" except for service-learning which is the percentage who responded that at least "Some" courses included a community-based project. All results weighted by institution-reported sex and enrollment status (and by institution size for comparison groups).

Response Detail

### **Southern Oregon University**

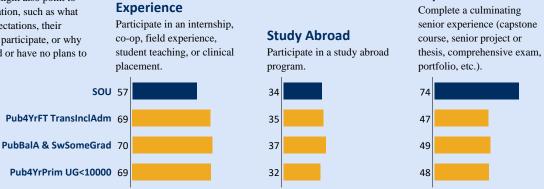

# **First-Year Students**

**Internship or Field** 

# **Plans to Participate**<sup>a</sup>

Knowing whether first-year students *plan* to participate in upper-division HIPs can reveal insights about HIP demand, awareness of opportunities, and the clarity of institutional information. These results might also point to topics for additional exploration, such as what contributes to students' expectations, their assumptions about who can participate, or why other students are undecided or have no plans to participate in the activity.

Percentage responding "Plan to do"

**Culminating Senior** 

**Experience** 

a. Refer to your Frequencies and Statistical Comparisons for details on the other response options.

Note: Results weighted by institution-reported sex and enrollment status (and institutional size for comparison groups).

**Participation by Student Characteristics** 

# **Southern Oregon University**

# **Participation in High-Impact Practices by Student Characteristics**

The table below displays the percentage of your students who participated in each HIP by selected student characteristics. Examining participation rates for different groups offers insight into how engagement varies within your student population.

Notes: Percentage of students who responded "Done or in progress" except for service-learning which is the percentage who responded that at least "Some" courses included a communitybased project. Percentages are not reported (—) for row categories containing fewer than 10 students. Results are unweighted, except for overall percentages which are weighted by sex and enrollment status.

a. Institution-reported variable. If provided, "Another" and "Unknown" categories for sex are not displayed due to low Ns, but do appear in the data file.

b. Neither parent (or guardian) holds a bachelor's degree.

c. These are NSSE's default related-major categories, based on first major if more than one was reported. Institution-customized major categories will be included on the Major Field Report, to be released in the fall. Excludes majors categorized as "all other."

# NSSE 2020 Multi-Year Report

Southern Oregon University

# NSSE 2020 Multi-Year Report

**About This Report** 

# **About Your Multi-Year Report**

For institutions participating in multiple NSSE administrations since 2013, the year of the last survey update, this report presents year-to-year results for Engagement Indicators (EIs), High-Impact Practices (HIPs), and key academic challenge items to illustrate patterns of change or stability. It also provides details such as number of respondents, standard deviation, and standard error so that statistical tests can be calculated.

For more information and recommendations for analyzing NSSE data over time, view our webinar entitled *Recommendations for Using Multiple Years of NSSE Data:* http://go.iu.edu/2R1r

This report contains three main parts: (a) a page that provides a quick reference to important information about each year's administration, (b) multi-year figures, and (c) detailed statistics. Key terms and features are illustrated below.

### **Report sections**

Administration Summaries (p. 3)	A summary of respondent counts, response rates, sampling errors, and administration details for each participation year.
Engagement Results by Theme (pp. 4-7)	Results for ten EIs and selected individual survey items are displayed, organized under four broad themes. The Academic Challenge theme is represented by four EIs as well as several individual items. The three remaining engagement themes (Learning with Peers, Experiences with Faculty, and Campus Environment) are each represented by two EIs.
High-Impact Practices (pp. 8-9)	Results for six HIPs are displayed. First-year student results indicate students who participated in service-learning, a learning community, and research with faculty, and who <i>planned to do</i> an internship or field experience, study abroad, and a culminating senior experience. Senior results indicate students who participated in all six.
Detailed Statistics (pp. 10-13)	Displays detailed information for results including counts, standard errors, and confidence intervals (CIs) for each measure.

#### Interpreting year-to-year results

When examining year-to-year results, you may wonder whether observed differences signify meaningful change and whether a trend is indicated. Figures display CIs around each score showing the range of values that is estimated to contain the population score 95% of the time. Upper and lower CI bounds are also reported in the Detailed Statistics section.

#### For further investigation

The Report Builder, updated with current data in the fall, allows for multi-year analysis of Engagement Indicators and individual items (including HIPs). It also affords the analysis of results by subpopulation.

# NSSE 2020 Multi-Year Report

Administration Summaries Southern Oregon University

The precision of an institution's population estimates can vary between administrations. An important early step in conducting a multi-year analysis is to review data quality. The values in the tables below were drawn from your *Administration Summary* reports.

2019	Email	Census	Yes	Learning with Tech, FY Experiences / Sr Transitions	No	No	No
2020	Email	Census	Yes	FY Experiences / Sr Transitions, Sustainability Education Consortium	No	No	No

Note: All of your institution's participation years since 2013 (the first year of the updated NSSE) are reported. Years in which your institution did not participate are blank.

a. Response rates (number of respondents divided by sample size) are adjusted for ineligibility, nondeliverable addresses, and students who were unavailable during the survey administration.

b. Sampling error gauges the precision of results based on a sample survey. It is an estimate (at the 95% confidence level) of how much survey item percentages for your respondents could differ from those of the entire

population of students at your institution. While data with larger sampling errors (such as +/-10%) need not be dismissed out of hand, such results should be interpreted more conservatively.

c. Count used to calculate response rates and sampling errors for each Administration Summary report. Includes all census-administered and randomly sampled students, regardless of "Report Sample" designation.

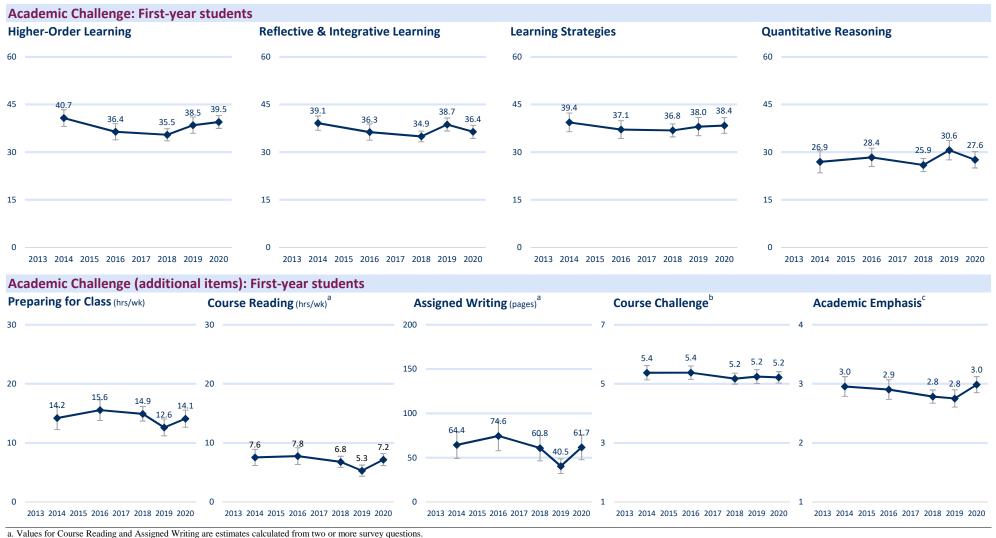

d. Starting in 2017, institutions had the option to flag a subset of students for exclusion from reports. Refer to your Administration Summary reports.

# **NSSE** national survey of student engagement

# NSSE 2020 Multi-Year Report Engagement Results by Theme

**Southern Oregon University** 

Engagement Indicators (EIs) represent the average student responses to a set of related survey questions. The Academic Challenge theme contains four EIs as well as several important individual items. See pages 10-12 for detailed statistics. For more information, including the items that make up each EI, refer to your *Engagement Indicators* report.

a. Values for Course Reading and Assigned writing are estimates calculated from two or more survey question.

b. Extent to which courses challenged students to do their best work (1 = "Not at all" to 7 = "Very much").

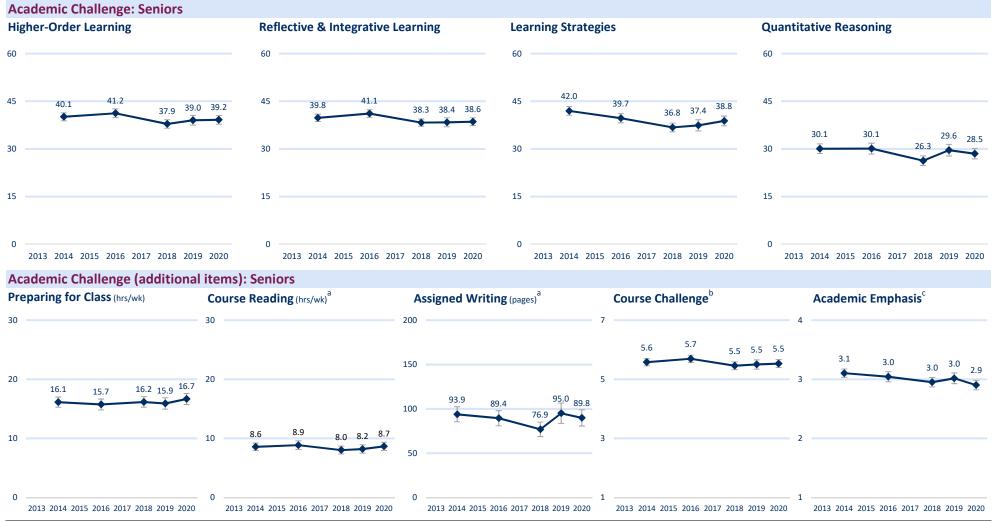

c. How much students said the institution emphasizes spending significant time studying and on academic work (1 = "Very little," 2 = "Some," 3 = "Quite a bit," and 4 = "Very much").

# NSSE 2020 Multi-Year Report Engagement Results by Theme

## High-Impact Practices Southern Oregon University

**Research with Faculty** 

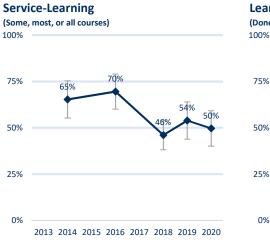

(Done or in progress)

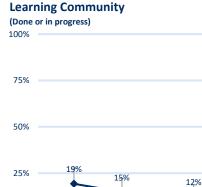

100%

75%

Due to their positive associations with student learning and retention, special undergraduate opportunities are designated "high-impact." The figures below display first-year students' participation, or intent to participate, in High-Impact Practices (HIPs) by year. See page 13 for detailed statistics. For more information, refer to your *High-Impact Practices* report.

#### **High-Impact Practices: First-year students**

2013 2014 2015 2016 2017 2018 2019 2

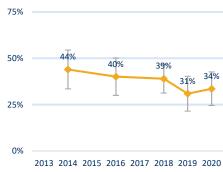

## Internship/Field Experience

(Plan to do)

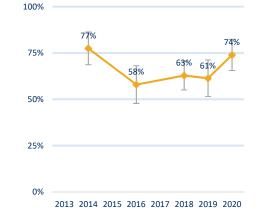

100%

#### Culminating Senior Experience (Plan to do)

#### **Overall first-year HIP participation**

The figure below displays the percentages of first-year students who participated in at least one high-impact practice. The figure is limited to participation in service-learning, a learning community, and research with faculty.

NSSE founding director George Kuh recommends that institutions aspire for all students to participate in at least two HIPs over the course of their undergraduate experience one during the first year and one in the context of their major.

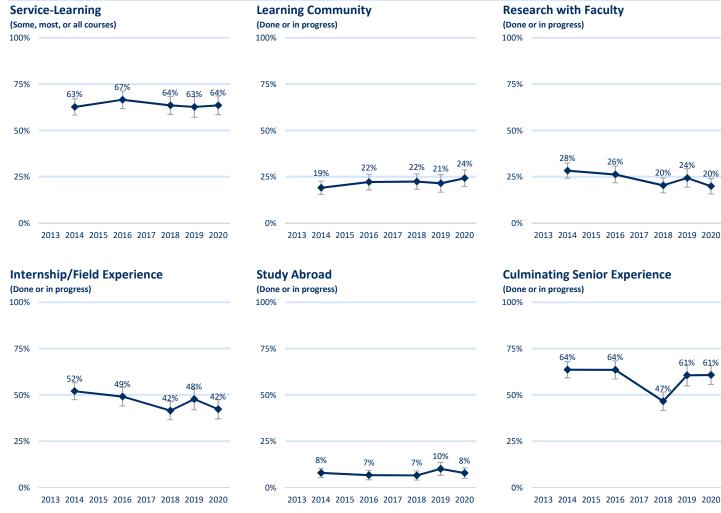

## NSSE 2020 Multi-Year Report High-Impact Practices

#### **Southern Oregon University**

Due to their positive associations with student learning and retention, special undergraduate opportunities are designated "high-impact." Participation in High-Impact Practices (HIPs) by year is displayed in the figures below. See page 13 for detailed statistics. For more information, refer to your *High-Impact Practices* report.

#### High-Impact Practices: Seniors

#### **Overall senior HIP participation**

The figure below displays the percentages of seniors who participated in one, and two or more, high-impact practices. The figure includes all six HIPs.

NSSE founding director George Kuh recommends that institutions aspire for all students to participate in at least two HIPs over the course of their undergraduate experience one during the first year and one in the context of their major.

Notes: n = Number of respondents; SE = Standard error of the proportion (sqrt[ ( p \* (1 - p )) / (n - 1)]) where p is the proportion; upper and lower bounds represent the 95% confidence interval (p +/- 1.96 \* SE).

a. Results are the percentage who had done the activity.

b. First-year results are the percentage who planned to do the activity; Senior results are the percentage who had done the activity.

c. First-year results are limited to participation in a Learning Community, Service-Learning, and Research with Faculty; senior results include all six HIPs.

# NSSE 2020 Topical Module Report First-Year Experiences and Senior Transitions

Southern Oregon University

IPEDS: 210146

## Administration Summary Southern Oregon University

### **About This Topical Module**

This module includes a set of items only for first-year students and a set only for seniors, with questions adapted from the Beginning College Survey of Student Engagement and the Strategic National Arts Alumni Project, respectively. The first-year items focus on academic perseverance, help-seeking behaviors, and institutional commitment, while the senior items explore post-graduation plans, links between the academic major and future plans, and confidence with skills developed during college.

#### **Comparison Group**

This section summarizes how this module's comparison group was identified, including selection criteria and whether the default option was taken. This is followed by the resulting list of institutions represented in the 'Pub1stYr SrTran<10000' column of this report.

Group label	Pub1stYr SrTran<10000
Date submitted	5/21/20
How was this comparison group constructed?	Your institution customized this group by selecting institutional characteristics and then adding or removing institutions from the resulting list. Selected characteristics included: Sector (Pub); UG Enrollment (2.5-10K)
Group description	Any public 4 year administering the first-year, senior transitions question set with 2500-10000 UG enrl. Exclud

#### 8. Is there anything your institution could have done better to prepare you for your career or further education? Please describe.

This final question asked students to respond in an open text box. Comments were recorded for 113 seniors. Responses are provided in your "NSSE20 Student Comments" report and in a separate SPSS data file.

These open-ended responses appear exactly as respondents entered them and may not be suitable for distribution without prior review.

Endnotes

#### **Southern Oregon University**

#### **Endnotes**

- a. Column percentages are weighted by institution-reported sex and enrollment status (and institution size for comparison groups). Percentages may not sum to 100 due to rounding. Counts are unweighted; column percentages cannot be replicated from counts.
- b. All statistics are weighted by institution-reported sex and enrollment status (and institution size for comparison groups). Unless otherwise noted, statistical comparisons are two-tailed independent *t*-tests. Items with categorical response sets are left blank.
- c. These are the values used to calculate means. For the majority of items, these values match the codes in the data file and codebook.
- d. Effect size for independent t- tests uses Cohen's d; z- tests use Cohen's h.
- e. Statistics are weighted by institution-reported sex and enrollment status (and institution size for comparison groups). Categorical items are not listed.
- f. The 95% confidence interval for the population mean is equal to the sample mean plus or minus 1.96 times the standard error of the mean.
- g. A measure of the amount individual scores deviate from the mean of all the scores in the distribution.
- h. Degrees of freedom used to compute the t-tests. Values differ from Ns due to weighting and whether equal variances were assumed.
- i. Statistical comparisons are two-tailed independent *t*-tests or *z*-tests. Statistical significance represents the probability that the difference between your students' mean and that of the students in the comparison group is due to chance.
- j. Statistical comparison uses *z* test to compare the proportion who responded (depending on the item) "Done or in progress" or "Yes" with all who responded otherwise.
- k. Mean represents the proportion who responded (depending on the item) "Done or in progress" or "Yes."

#### Key to symbols:

- **Your students' average** was significantly higher (p < .05) with an effect size at least .3 in magnitude.
- $\triangle$  Your students' average was significantly higher (p < .05) with an effect size less than .3 in magnitude.
- $\nabla$  Your students' average was significantly lower (p < .05) with an effect size less than .3 in magnitude.
- **Vour students' average** was significantly lower (p < .05) with an effect size at least .3 in magnitude.

Note: It is important to interpret the direction of differences relative to item wording and your institutional context.

# NSSE 2020 Consortium Report Sustainability Education Consortium

Southern Oregon University

IPEDS: 210146

#### **About This Consortium Report**

#### **Consortium Coordinator**

Daita Serghi, Education Programs Manager, Association for the Advancement of Sustainability in Higher Education, daita.serghi@aashe.org

#### **Comparison Group**

This section summarizes how your consortium comparison group was identified, including selection criteria and whether the default option was taken. This is followed by the resulting list of institutions represented in the 'SustQuest AnyInst' column of this report.

Group label	SustQuest AnyInst
Date submitted	5/21/20
How was this comparison group constructed?	Your institution retained the default comparison group (all consortium participants).
Group description	Any institution in NSSE 2019 or 2020 that included the Sustainability Education Consortium question set. (very low N so this comparison group includes all categories)

#### SustQuest AnyInst (N=8)

Aquinas College (Grand Rapids, MI) College of Charleston (Charleston, SC)\* Dickinson College (Carlisle, PA)\* Huston-Tillotson University (Austin, TX)\* Naropa University (Boulder, CO) New School, The (New York, NY)\* University of Hawai'i at Manoa (Honolulu, HI) Wiley College (Marshall, TX)\*

# Southern Oregon University

### **Endnotes**

- a. Column percentages are weighted by institution-reported sex and enrollment status (and institution size for comparison groups). Percentages may not sum to 100 due to rounding. Counts are unweighted; column percentages cannot be replicated from counts.
- b. All statistics are weighted by institution-reported sex and enrollment status (and institution size for comparison groups). Unless otherwise noted, statistical comparisons are two-tailed independent *t*-tests. Items with categorical response sets are left blank.
- c. These are the values used to calculate means. For the majority of items, these values match the codes in the data file and codebook.
- d. Effect size for independent t- tests uses Cohen's d; z- tests use Cohen's h.
- e. Statistics are weighted by institution-reported sex and enrollment status (and institution size for comparison groups). Categorical items are not listed.
- f. The 95% confidence interval for the population mean is equal to the sample mean plus or minus 1.96 times the standard error of the mean.
- g. A measure of the amount individual scores deviate from the mean of all the scores in the distribution.
- h. Degrees of freedom used to compute the t-tests. Values differ from Ns due to weighting and whether equal variances were assumed.
- i. Statistical comparisons are two-tailed independent *t*-tests or *z*-tests. Statistical significance represents the probability that the difference between your students' mean and that of the students in the comparison group is due to chance.
- j. Statistical comparison uses *z* test to compare the proportion who responded (depending on the item) "Done or in progress" or "Yes" with all who responded otherwise.
- k. Mean represents the proportion who responded (depending on the item) "Done or in progress" or "Yes."

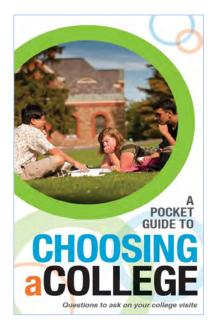

#### Key to symbols:

- **Your students' average** was significantly higher (p < .05) with an effect size at least .3 in magnitude.
- $\triangle$  Your students' average was significantly higher (p < .05) with an effect size less than .3 in magnitude.
- $\nabla$  Your students' average was significantly lower (p < .05) with an effect size less than .3 in magnitude.
- **Your students' average** was significantly lower (p < .05) with an effect size at least .3 in magnitude.

Note: It is important to interpret the direction of differences relative to item wording and your institutional context.

# A Pocket Guide to Choosing a College: NSSE 2020 Answers from Students Using the Report

To focus public awareness on what constitutes quality in the college experience, NSSE developed *A Pocket Guide to Choosing a College*. This helpful brochure gives prospective students and their families key questions to ask during their campus visits or virtual tours, allowing them to actively consider student engagement during the college choice process.

Student responses to selected questions from the NSSE pocket guide are presented in a report entitled *A Pocket Guide to Choosing a College: NSSE 2020 Answers from Students,* part of your NSSE *Institutional Report 2020.* 

## Who can use this report?

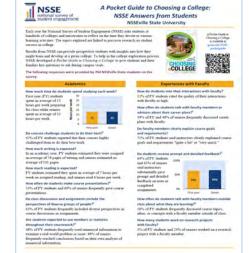

A Pocket Guide to Choosing a College: NSSE 2020 Answers from Students is a summary of student engagement on your campus. It may be of special interest to admissions professionals, particularly those distributing the NSSE pocket guide to visiting students. The results can also be used as a resource for orientation staff, advisors, faculty, and others who work regularly with first-year students.

## How can an institution customize and distribute results?

A Pocket Guide to Choosing a College: NSSE 2020 Answers from Students is designed for sharing NSSE results. The report is delivered in both PDF and Excel formats so that institutions can easily insert logos, campus photos, or additional information. Institutions are encouraged to post copies of the report and other results from their NSSE *Institutional Report 2020* on their websites.

## How can I get a copy of this report for my institution?

Each participating institution designates a staff member to serve as the primary liaison for NSSE correspondence and reports. Known as the Campus Project Manager (CPM), the primary liaison may assist you in obtaining a copy. Contact NSSE for help identifying your CPM.

## How can I get copies of the NSSE pocket guide?

College and university admissions officers may request up to 300 free NSSE pocket guides per year. Additional quantities are available for a small fee. A Spanish version of the NSSE pocket guide, *Una Guía de Bolsillo Para Escoger una Universidad: Preguntas a Hacer en Tus Visitas Universitarias,* is also available.

The QR code at left can be used to access a mobile version of the NSSE pocket guide. It is available on the NSSE website for institutions to include in their recruitment, college fair, and campus tour materials.

go.iu.edu/NSSE-pocketguide

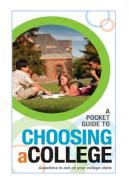

If you have questions about these resources, contact the NSSE Institute at **nsse@indiana.edu** or toll-free at 866-435-6773.

# A Pocket Guide to Choosing a College: NSSE 2020 Answers from Students Southern Oregon University

Each year the National Survey of Student Engagement (NSSE) asks students at hundreds of colleges and universities to reflect on the time they devote to various learning activities. The topics explored are linked to previous research on student success in college.

Results from NSSE can provide prospective students with insights into how they might learn and develop at a given college. To help in the college exploration process, NSSE developed *A Pocket Guide to Choosing a College* to give students and their families key questions to ask during campus visits or virtual tours.

A Pocket Guide to Choosing a College is available at go.iu.edu/NSSEpocketguide

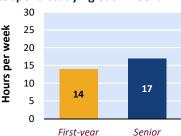

#### The following responses were provided by 548 SOU students on the 2020 survey.

#### **Academics**

#### How much time do students spend studying each week?

First-year (FY) students spent an average of 14 hours per week preparing for class while seniors spent an average of 17 hours per week.

#### Do courses challenge students to do their best?<sup>a</sup>

39% of FY students reported that their courses highly challenged them to do their best work.

#### How much writing is expected?

In an academic year, FY students estimated they were assigned an average of 62 pages of writing and seniors estimated an average of 90 pages.

#### How much reading is expected?

FY students estimated they spent an average of 7 hours per week on assigned reading, and seniors read 9 hours per week.

#### How often do students make course presentations?<sup>b</sup>

49% of FY students and 62% of seniors frequently gave course presentations.

#### Do class discussions and assignments include the

#### perspectives of diverse groups of people?<sup>b</sup>

57% of FY students frequently included diverse perspectives in course discussions or assignments.

# Are students expected to use numbers or statistics throughout their coursework?<sup>b</sup>

43% of FY students frequently used numerical information to examine a real-world problem or issue; 48% of seniors frequently reached conclusions based on their own analysis of numerical information.

#### **Experiences with Faculty**

**How do students rate their interactions with faculty?**<sup>c</sup> 74% of FY students rated the quality of their interactions with faculty as high.

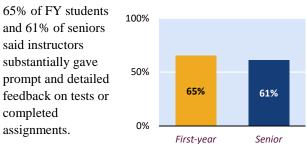

# How often do students talk with faculty members or advisors about their career plans?<sup>b</sup>

46% of FY and 46% of seniors frequently discussed career plans with faculty.

# Do faculty members clearly explain course goals and requirements?

73% of FY students said instructors clearly explained course goals and requirements "quite a bit" or "very much."

#### Do students receive prompt and detailed feedback?<sup>d</sup>

# How often do students talk with faculty members outside class about what they are learning?<sup>b</sup>

36% of FY students frequently discussed course topics, ideas, or concepts with a faculty member outside of class.

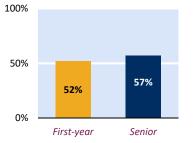

# How many students work on research projects with faculty?

3% of FY students and 20% of seniors worked on a research project with a faculty member.

#### **Learning with Peers**

#### How often do students work together on course projects

and assignments?<sup>b</sup> 52% of FY students and 57% of seniors frequently worked with their peers on course projects and assignments.

#### Do students help each other learn?<sup>b</sup>

53% of seniors frequently explained course material to one or more students.

# How often do students work together to prepare for exams?<sup>b</sup>

46% of FY students frequently prepared for exams by discussing or working through course material with other students.

#### How often do students interact with others who have different viewpoints or who come from different backgrounds?<sup>b</sup>

Among FY students, 46% frequently had discussions with people with different political views, 67% frequently had discussions with people from a different economic background, and 63% frequently had discussions with people from a different race or ethnicity.

#### **Campus Environment**

## Are students encouraged to use learning support

#### services (tutors, writing center)?<sup>d</sup>

75% of FY students said the institution substantially emphasized the use of learning support services.

# How do students rate their interactions with academic advisors?<sup>c</sup>

68% of FY students and 65% of seniors gave the quality of their interactions with academic advisors a high rating.

#### How well do students get along with each other?<sup>c</sup>

50% of FY students gave the quality of their interactions with their peers a high rating.

# How satisfied are students with their educational experience?

82% of FY and 81% of seniors rated their entire educational experience at this institution as "excellent" or "good."

#### **Rich Educational Experiences**

# What types of honors courses, learning communities, and other distinctive programs are offered?

During their first year, 10% of students participated in a learning community. By spring of their senior year, 61% of students had done (or were doing) a culminating senior experience.

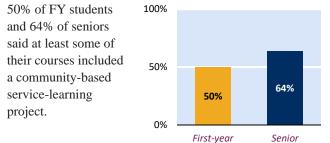

#### How many students study in other countries?

By their senior year, 8% of students had studied abroad.

# How many students get practical, real-world experience through internships or field experiences?

By spring of their senior year, 42% of students had participated in some form of internship, co-op, field experience, student teaching, or clinical placement.

# How many courses include community-based service-learning projects?<sup>e</sup>

#### Notes

- a. "Highly" is a 6 or 7 on a seven-point scale where 1 is "Not at all" and 7 is "Very much."
- b. "Frequently" is "Often" or "Very often."
- c. A "High" rating is a 6 or 7 on a seven-point scale where 1 is "Poor" and 7 is "Excellent."
- d. "Substantially" is "Quite a bit" or "Very much."
- e. "At least some" is defined by combining responses of "Some," "Most," and "All."

# NSSE 2020 Selected Comparison Groups

Southern Oregon University

# **NSSE 2020 Selected Comparison Groups**

**About This Report** 

#### **Comparison Groups**

The NSSE *Institutional Report* displays core survey results for your students alongside those of three comparison groups. In May, your institution was invited to customize these groups via a form on the Institution Interface. This report summarizes how your comparison groups were constructed and lists the institutions within them.

NSSE comparison groups may be customized by (a) identifying specific institutions from the list of all 2019 and 2020 NSSE participants, (b) composing the group by selecting institutional characteristics, or (c) a combination of these. Institutions that chose not to customize received default groups<sup>a</sup> that provide relevant comparisons for most institutions.

Institutions that appended additional question sets in the form of Topical Modules or through consortium participation were also invited to customize comparison groups for those reports. The default for those groups was all other 2019 and 2020 institutions where the questions were administered. Comparison group details for Topical Module and consortium reports are documented separately in those reports.

#### **Reading This Report**

This report consists of three sections that provide details for each of your comparison groups, illustrated at right.

#### Comparison Group Name

The name assigned to the comparison group is listed here.

#### How Group was Constructed -

Indicates whether your group was drawn from a list, built based on criteria, or is the default group. If institutional characteristics were used to build your comparison group, they are listed here.

#### Institution List

The names, cities and states or provinces of the comparison institutions are listed for your reference. NSSE 2019 participants are identified with an asterisk.

	Date submitted	5/29/20XX
	How was this comparison group constructed?	Your institution customized this comparison group by selecting from the list of all NSSE participants.
	Group description (as provided by your institution)	All other current- and prior-year participants with the same Carnegie Classification and sector in our region.
	Admissions Overlap	(N=20)
	Albertus Magnus College (New H	Haven, CT)*
	American International College (	
	American International College ( Anna Maria College (Paxton, MA	A)
<b>→</b>	American International College () Anna Maria College (Paxton, MA Bryant University (Smithfield, RI	a) D
	American International College () Anna Maria College (Paxton, MA Bryant University (Smithfield, RI Champlain College (Burlington, )	A) D TJ**
	American International College () Anna Maria College (Paxton, MA Bryant University (Smithfield, RI	A) D TJ**

a. The default groups are:

Comparison Group 1: For institutions not in a NSSE consortium, this group contains 2019 and 2020 NSSE institutions in the same geographic region and sector (public/private). For consortium institutions, it contains results for the other 2019 (if applicable) and 2020 consortium members.

Comparison Group 2: All other 2019 and 2020 U.S. NSSE institutions sharing your institution's Basic Carnegie Classification. (Canadian institutions are not classified by the Carnegie Foundation, and must identify a comparison group.)

Comparison Group 3: All other 2019 and 2020 U.S. NSSE institutions (2019 and 2020 Canadian participants are also included in this group for Canadian institutions).

### Comparison Group 1: Pub4YrFT TransInclAdm

This section summarizes how this group was identified, including selection criteria and whether the default group was used. This is followed by the resulting list of institutions in this group.

Date submitted	5/21/20
How was this comparison group constructed?	Your institution customized this group by selecting institutional characteristics as follows:
	NSSE Year (2020); Basic Classification (All Master's All Bacc); Sector (Pub); UG Profile (FT 4yr/Inclu/HiTrans)
Group description (as provided by your institution)	Public 4 year institutions, 2500-10000 UG enrl with high number of transfer in students and an inclusive admissions policy.

#### Pub4YrFT TransInclAdm (N=28)

Bowie State University (Bowie, MD) California State University, Los Angeles (Los Angeles, CA) California State University, Sacramento (Sacramento, CA) Chadron State College (Chadron, NE) Colorado State University-Pueblo (Pueblo, CO) Eastern Washington University (Cheney, WA) Fort Valley State University (Fort Valley, GA) Framingham State University (Framingham, MA) Francis Marion University (Florence, SC) Montana State University-Northern (Havre, MT) Norfolk State University (Norfolk, VA) Northern Vermont University (Johnson, VT) Prairie View A&M University (Prairie View, TX) San Francisco State University (San Francisco, CA) Savannah State University (Savannah, GA) Southern Connecticut State University (New Haven, CT) Southern University at New Orleans (New Orleans, LA) SUNY College at Old Westbury (Old Westbury, NY) SUNY College of Agriculture and Technology at Cobleskill (Cobleskill, NY) SUNY College of Technology at Canton (Canton, NY) SUNY-Buffalo State College (Buffalo, NY) University of Maine at Presque Isle (Presque Isle, ME) University of North Carolina at Pembroke (Pembroke, NC) University of South Carolina Aiken (Aiken, SC) University of Virginia's College at Wise, The (Wise, VA) Western Oregon University (Monmouth, OR) William Paterson University of New Jersey (Wayne, NJ) Winston-Salem State University (Winston-Salem, NC)

### Comparison Group 2: PubBalA & SwSomeGrad

This section summarizes how this group was identified, including selection criteria and whether the default group was used. This is followed by the resulting list of institutions in this group.

Date submitted	5/21/20
How was this comparison group	Your institution customized this group by selecting institutional characteristics as follows:
constructed?	Basic Classification (All Master's, All Bacc); Enrollment Profile (High UG, Maj UG); Sector (Pub); UG Enrollment (2.5-10K); UG Instr Prog (Bal/Some grad coex)
Group description (as provided by your institution)	Public 4 year, UG enrl between 2500 and 10000 with balanced Arts & Sciences and some graduate student programs.
