1. Courses are loaded at the assigned credits except lab and studio courses which are loaded at 2/3 the assigned credits.
2. Default course loads (1.) may be permanently overridden in unusual situations.  
Examples include lecture/lab mixes and courses with habitually large enrollments.  
Permanent overrides should be at the minimum value that will ever be used.  
Minimum enrollments may also be increased when permanently overriding loads.
3. After enrollments are finalized, loading is recalculated at 1/6\*enrollments\*course load up to 6 enrollments.  
Loading for courses for which students may enroll for different credit amounts are recalculated at 1 ELU per 6 SCH -- up to a maximum of 3 ELUs.
4. For term-to-term adjustments for course prep, large enrollments, etc., adjust loading using non-instructional assignments.
