

Excel Formulas

Formulas and functions are an important part of Excel. Not only do we need them to calculate totals, but we also can use them to forecast and plan for the future. We'll look closely at the differences between them, and learn not only how to use them, but where to find help when necessary.

Here's some of what we'll cover:

- Order of precedence
- Basic formulas
- Formulas vs. Functions
- Copying and Pasting Formulas
- Relative vs. Absolute cells
- Complex Formulas
- 3 dimensional formulas
- Auditing Formulas
 - Trace precedents
 - Trace Dependents
- Basic Functions
 - SUM
 - Average
- Help with Functions
- Viewing formulas
- Editing formulas
- Divide by Zero Error
- Using the IF function
- Using VLOOKUP Function
