

Shared Interest Group (SIG) Name: Anthropology, Evolution, Animal Domestication

Description: We are a group of OLLI enthusiasts who are interested in human and non-human evolution (so the latest on whether dinosaurs were homeotherms is fair game!). We have a subject or theme each meeting and also have time for wide-ranging discussions. We have looked at animal domestication, especially that of dogs and cats, and all the latest on new finds in human ancestors. We explore genetic research in all these areas as well. We share the latest info from reputable sources (Science/AAAS, AAA, other journals) and focus our discussion on evidence-based conclusions as well as new theoretical frameworks. And we have one heck of a lot of fun!

Facilitator: Victoria Leo 253-203-6676 victoria@soaringdragon.biz

Group size limited to 100

Meeting time and location: TBD
