## THE ISSR LIBRARY PROJECT

### HANNON LIBRARY ACQUIRES 250 SCIENCE AND RELIGION BOOKS

The International Society for Science & Religion (ISSR) has generously given Hannon Library a collection of 250 science and religion books. These texts span important areas and disciplines in the study of science and religion, as well as key international and intercultural voices.

This foundational collection was awarded to Hannon Library through a competitive grant process. The grant application was a collaboration of faculty in Hannon Library and the SOU Philosophy program. A special volume, *A Companion to the ISSR Library of Science and Religion*, lists all the books in the collection and provides an introductory essay for each one.

The ISSR collection is currently displayed in the New Book Alcove on the first floor of Hannon Library. These books are available for check out.
