to Terry, Jody, Patrick, Lauren, Stewart, me

Hi Terry,

Is this enough for curriculum committee to review the request to add the major restriction to each of EE 507, 524, 525, 526, 527, 528, 529, 592, 594, and 595, specifically, "restricted to students enrolled in the Environmental Education Masters Program."

Problem — Using instructor permission required is a cumbersome tool when screening is only needed to assure non-EE students are well prepared and understand the expectations prior to registering.

Impacted courses — EE 507, 524, 525, 526, 527, 528, 529, 592, 594, and 595

Remedy — Use a major restriction on these courses instead

Rationale — Instructor permission required is cumbersome with this quantity of courses and students. Using the major restriction would streamline the process for EE students, but still provide the option for non-EE students to seek instructor permission. Non-EE students registering for these courses is very rare. This change would make it easier for EE students to register for these courses. It would not change the process for non-EE students wanting to register for these courses.

If so, Crystal can attend Graduate Council to answer questions.

Sherry
